NSA hits four-year high on Inc. 5000 list

By Robert L. Frost, Ph.D., President

I am very proud to announce that NSA has earned a spot on the Inc.5000 list of the fastest-growing private companies in the U.S. for the fourth year in a row.

This year, NSA is ranked No. 1222, up from No. 1563 in 2010, and up from No. 3955 when the company debuted on the list in 2008.

Inc. magazine compiles the annual list to recognize fast-growing, entrepreneurial companies. Rankings are based on annual revenue growth over the past three years and NSA's resounding 241% increase during this time period fueled our climb up the list.

While continuing to increase our ranking in the Inc.5000 list is rewarding in itself, what it ultimately means to us is that we are achieving our goal of becoming a recognized leader of providing high quality safety engineering, safeguards and security, and technical services in all sectors of the U.S. nuclear industry, as well as capitalizing on emerging market opportunities.

By The Numbers!

NSA Ranked No. 1222 on the Inc.5000 2011 list of the fastest growing privately-held companies in the U.S.

NSA Ranked No. 19 on the Inc.5000 list of top Engineering Firms in 2011.

Business Spotlight

Nuclear Safety and Licensing, Part II.

NSA's expertise in Nuclear and Safety Licensing is a core strength of our business. In our last issue of NSAConnect we highlighted our project success in two markets: 10CFR70 –Regulated Operations and DOE Facility Safety and Safety Basis Support; 10CFR830, 10CFR835, DOE Order 420.1, DOE-STD-3009, and DOE-STD-3007 compliance. In this issue we focus on our experience in the fields of Computation Neutron and Photon Physics (Shielding Analysis), 10CFR50-Regulated Operations, 10CFR71-Regulated Packaging and Transportation, and 10CFR72 Storage markets.

Coming Soon!

This fall NSA will launch a new client-focus website. The site will be a one-stop snapshot of NSA's capabilities and strengths, client success stories, and the latest in NSA news.

NSA & EPM Leverage Expertise to Address Severe Nuclear Reactor Accidents

NSA and Engineering Planning and Management (EPM) are combining their expertise in nuclear safety analysis, risk assessment and regulatory compliance to offer advanced services and solutions for nuclear plant operators addressing severe accident risks, regulatory responses, and mitigation of offsite consequences.

Through a new joint marketing agreement the two firms will pursue opportunities offering clients comprehensive services to include: analyses of Level 2 & 3 probabilistic risk assessments (PRA) based on a facility's existing PRA results, scenario simulations for degraded cores, containment systems, venting and filtering systems to develop updated facility source terms, modeling of plume dispersions, evacuation plans, and population doses to improve the facility response plans and to mitigate health and economic consequences of any severe accidents.

NSA Calendar

September 2011

ICNC 2011*
International Conference on Nuclear Criticality
 Conference sponsor Edinburgh, Scotland
 September 19 – September 22

ASIS
 Orlando, Florida
 September 19 – September 23

October 2011

East Tennessee Cyber Security Summit
 Knoxville, Tennessee
 October 12 – October 13

Weapons Complex Monitor Decision Makers Forum*
 Amelia Island, Florida
 October 12 – October 15

ANS Winter Meeting*
 Washington, DC
 October 30 – November 3

November 2011

ETEBA Conference
 Knoxville, Tennessee
 November 1 – November 3

*Stop by and visit us at our exhibit booth during these shows.
